

STEVE JOBS 2015

Film Workbook and Keynote Challenge

English for IT Students

Name: Miguel

Class: 1º DAW **Date:** 30-09-2026

Your viewing route

- **Part 1 — Macintosh, 1984:** Questions 1–12.
- **Part 2 — NeXT, 1988:** Questions 13–23.
- **Part 3 — iMac, 1998:** Questions 24–35.

Useful words

- **Launch:** introduce a new product.
- **Backstage:** behind the stage.
- **Engineer:** someone who designs or builds technology.
- **Feature:** something a product has or can do.
- **Prototype:** an early version used for testing.
- **Keynote:** the main presentation at an event.

PART 1 — MACINTOSH, 1984

1. Which product is Steve preparing to launch in 1984?

- A) The Apple Watch
- B) The Macintosh**
- C) The iPad
- D) The iPhone

2. What goes wrong with the voice demo?

- A) The computer cannot say “Hello”.**
- B) The keyboard is missing.
- C) The screen is too bright.
- D) The mouse is broken.

3. Who must fix the voice demo?

- A) John Sculley
- B) Andy Hertzfeld**
- C) Steve Wozniak
- D) Chrisann Brennan

4. Why is the Macintosh difficult to open?

- A) It is behind a locked door.
- B) It is too heavy.
- C) It has no case.
- D) It needs special tools.

5. IT — What does “hardware” mean?

- A) Files stored online
- B) The physical parts of a computer
- C) Instructions on a screen
- D) Computer programs

6. Who arrives with the young Lisa?

- A) A journalist
- B) Joanna Hoffman
- C) Her teacher
- D) Her mother Chrisann

7. What does Steve initially deny about Lisa?

- A) That she can read
- B) That she is at the launch
- C) That he is her father
- D) That she likes computers

8. What does Lisa make on the Macintosh?

- A) A music playlist
- B) A shopping list
- C) A drawing
- D) A computer game

9. IT — What does saving Lisa’s work do?

- A) Deletes the picture
- B) Keeps the work for later
- C) Switches the computer off
- D) Changes the screen size

10. What does Wozniak want Steve to do on stage?

- A) Lower the ticket price
- B) Cancel the launch
- C) Thank the Apple II team
- D) Introduce a new printer

11. How does Steve respond to Wozniak’s request?

- A) He changes the whole speech.
- B) He asks Lisa to do it.
- C) He gives Wozniak the stage.
- D) He refuses.**

12. What is John Sculley's job at Apple in this part?

- A) Chief executive**
- B) Software tester
- C) Photographer
- D) Security guard

PART 2 — NeXT, 1988

13. Which company is Steve leading in 1988?

- A) IBM
- B) Microsoft
- C) NeXT**
- D) Sony

14. Who is the NeXT computer mainly designed for?

- A) Professional footballers
- B) Taxi drivers
- C) Colleges and universities**
- D) Restaurant chefs

15. What shape is the NeXT computer?

- A) A sphere
- B) A pyramid
- C) A cylinder
- D) A cube**

16. What is Lisa using to check the computer's size?

- A) A ruler**
- B) A weighing scale
- C) A calculator
- D) A camera

17. What does Steve compare his role to when talking to Wozniak?

- A) A solo singer
- B) An orchestra conductor**
- C) A music critic
- D) A piano tuner

18. What important part of NeXT is not ready for the launch?

- A) The company name
- B) The black case
- C) The stage lights
- D) The operating system

19. IT — What does “OS” stand for?

- A) Operating system
- B) Office screen
- C) Online shop
- D) Open storage

20. IT — Why can NeXT still run its presentation?

- A) It uses a finished retail OS.
- B) It works without any software.
- C) It runs a special demo program.
- D) It is connected to an iMac.

21. What do Steve and Sculley argue about in this part?

- A) Who owns the theatre
- B) Why Steve lost his position at Apple
- C) Who designed the iPhone
- D) Why Lisa dislikes music

22. Who voted against Steve in the flashback?

- A) The audience
- B) The customers
- C) The university students
- D) Apple's board of directors

23. What does Joanna realise Steve wants NeXT to help him do?

- A) Become a music teacher
- B) Buy a newspaper
- C) Leave the computer industry
- D) Return to Apple

PART 3 — iMAC, 1998

24. Which computer is Steve preparing to introduce in 1998?

- A) The Apple II
- B) The Lisa

- C) The NeXT Cube
- D) The iMac

25. IT — Steve mentions USB ports. What are ports used for?

- A) Printing company logos
- B) Writing advertisements
- C) Connecting devices
- D) Changing the price

26. What is unusual about the iMac's case?

- A) It is completely black.
- B) It is made of wood.
- C) It is colourful and partly see-through.
- D) It is covered in leather.

27. What education cost causes an argument about Lisa?

- A) Her university fees
- B) Her school lunch
- C) Her driving lessons
- D) Her piano lessons

28. Who has paid Lisa's university fees?

- A) Joanna
- B) Andy Hertzfeld
- C) Wozniak
- D) Sculley

29. What does Wozniak ask for again before the iMac launch?

- A) Recognition for the Apple II team
- B) A new job at NeXT
- C) A free iMac for every guest
- D) A shorter presentation

30. How does the conversation with Sculley develop in 1998?

- A) They begin to make peace.
- B) They plan to close Apple.
- C) They agree never to meet again.
- D) They cancel the iMac.

31. What does Joanna push Steve to do before going on stage?

- A) Write a longer speech
- B) Repair his relationship with Lisa

- C) Hire more journalists
- D) Change the iMac's colour

32. What does Steve finally admit about the Lisa computer?

- A) It was named after a city.
- B) It was named after his daughter.**
- C) It was named by Wozniak.
- D) It had no real name.

33. What does Steve promise Lisa about music?

- A) Many songs in her pocket**
- B) A recording studio
- C) A larger cassette player
- D) A job in a band

34. What has Steve kept from Lisa's childhood?

- A) Her birthday cake
- B) Her first school uniform
- C) The drawing she made on the Mac**
- D) Her old headphones

35. How does the audience react as Steve goes on stage at the end?

- A) They cheer and applaud.**
- B) They ask for refunds.
- C) They leave in silence.
- D) They turn away.

THE 2026 APPLE KEYNOTE CHALLENGE

Your mission

Your team has one launch to impress the class!

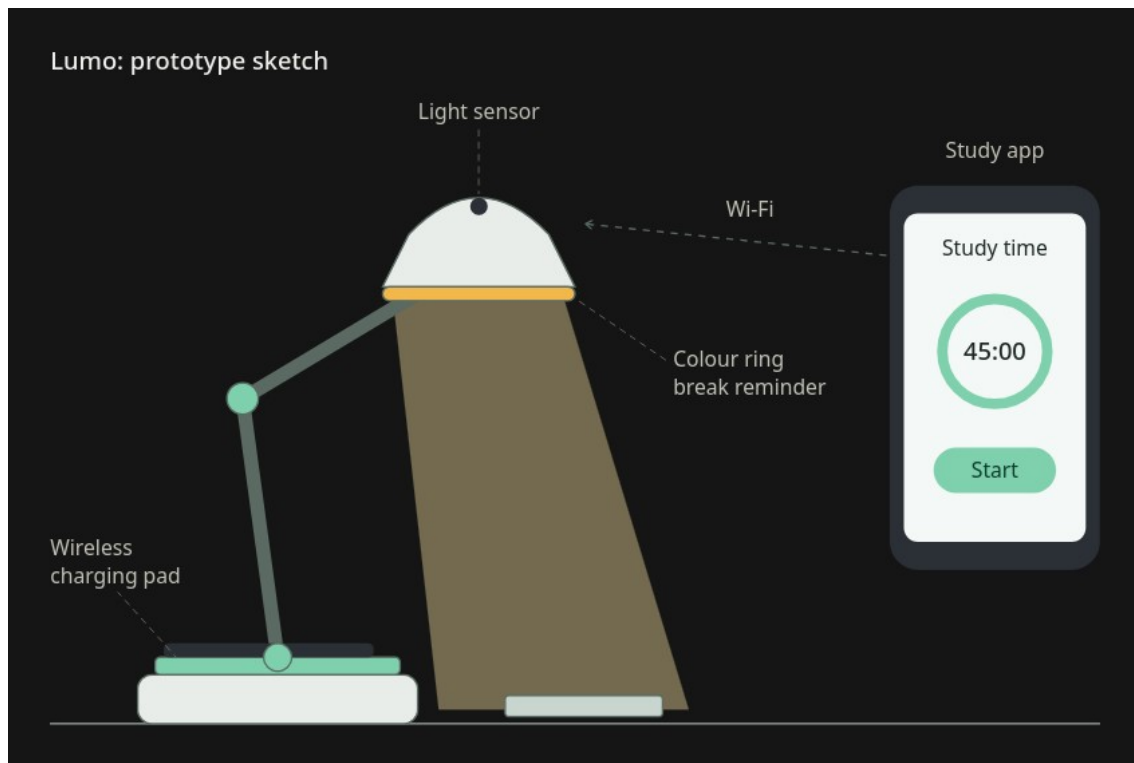

Invent a technology product that does not exist yet. It can solve an everyday problem, make life more fun or do something wonderfully unnecessary.

Work **in pairs or groups of three or alone**.

The rules

1. Complete the product plan below in English.
2. Prepare a drawing, a prototype .

3. Use at least **three technology words** in your presentation.
4. Everyone in the team must speak.
5. Finish with a surprise: say **“And one more thing...”** and reveal an extra feature.

Product plan

Product name: Lumo

What is it? A smart desk lamp that looks after your eyes, your battery and your concentration at the same time.

The problem it solves: Most of us have been in the situation where we sit down to study "for an hour" and look up three hours later with a headache and a dead phone. Poor lighting makes us tired faster, and nothing tells us when to stop. Lumo deals with both problems.

How it works:

- A built-in sensor measures the natural light in the room and adjusts the brightness and colour temperature automatically.
- Its artificial intelligence learns your study habits. When you have been working for too long without a break, the colour ring at the bottom of the shade changes gently from white to amber, like a polite nudge.
- The base doubles as a wireless charging pad, so your phone charges while you study, and it stays out of your hands.

- A companion app, connected via Wi-Fi, lets you set study sessions and track your progress.

Target users: University students, remote workers and gamers, basically anyone who spends long hours at a desk.

Price and colours: 79€, available in white, black and mint green.

Technology words I will use: Sensor, artificial intelligence, wireless charging, Wi-Fi, app, hardware, software.

And one more thing: Lumo tells you when you finish the timer for the study session.
